## DETAILED ACTION

### *Allowable Subject Matter*

1. **Claims 1-15 and 18-20** (now renumbered as *claims 1-18*) are allowed.
2. The following is an examiner's statement of reasons for allowance: None of the references either singularly or in combination teach or fairly suggests a segmenting-range setting unit coupled to a level segmenting unit for calibrating a range associated with the plurality of levels into which an analog signal is segmented by the level segmenting unit, the range changing in response to the pressing operation of the controller as recited in **claims 1 and 4**, or a segmenting range setting unit for calibrating the range in response to the load exerted on the pressure sensitive device, and segmenting the detected analog signal into a plurality of signal levels within the calibrated range, whereby the signal output of the control apparatus is adjusted, as recited in **claim 18**. Specifically Copper et al. (U.S. Patent No. 5,485,171) teaches all that is required however fails to teach calibrating a range associated with the plurality of levels of the level-segmenting unit based on the pressing operation of the user as recited in the claims. Copper et al. teaches that the voltage levels of the transducer are predetermined by circuit parameters and thereby do not change in response to the pressure applied to the transducer. None of the other cited references make up for this deficiency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
